

# CANANDAIGUA LAKE WATERSHED COUNCIL

PROTECTING THE LIFEBLOOD OF OUR REGION

## Draft Onsite Wastewater Treatment System Law Public Review Session

A new model local law for onsite wastewater systems was recently developed for municipalities within the Canandaigua Lake watershed.

The model law is a tool to help municipalities to address the ongoing concern with improperly functioning onsite systems which is one of several substantial sources of nutrients to the lake, contributing to algal blooms and aquatic weed growth.

**Public feedback is critical to ensure a local law is crafted that will work for each of the municipalities.** Join us at this public information session for the opportunity to:

- Review most recent draft law
- Get further information and ask questions
- Provide feedback on proposed law

**Who should attend:** watershed residents, and municipal officials

## PUBLIC INFORMATION SESSION-2

Monday, Aug. 15th  
6 – 8 PM

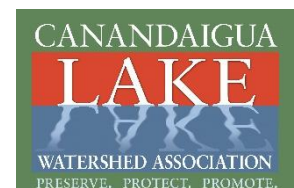

South Bristol Town Hall  
6500 Gannett Hill Road  
Naples NY 14512
