Detailed Description of Work _____

The total square feet of the proposed soil disturbance will be _____.

Soil Disturbance

A specific area as defined in the threshold tables where the natural vegetative cover will be removed. Soil disturbance is inclusive of placing or filling soil on top of the natural vegetative cover.

Please Note

Applicant must be able to illustrate where the area of disturbance will be on the property. This may be in the form of a survey supplied by the applicant or defining the location on the official town maps. If a permit is required, it shall be prominently displayed at the project site and the applicant shall notify the Code Enforcement Officer five (5) days prior to commencing work. If a determination is made that a permit is not required and subsequent observations by the Code Enforcement Officer indicate that a threshold is exceeded, then a Stop Work Order will be issued until the professionally prepared erosion and sediment control plan is in place.

The Applicant should be aware that it is a violation of N.Y.S. Environmental Conservation Law to allow discharge of sediment or other pollutants from a disturbed area to cause a substantial visible contrast to a watercourse. Penalties can reach \$37,500 per day.

Acknowledgement

If it is determined that a Steep Slopes Permit is required, the applicant is afforded the opportunity to have the Erosion and Sediment Control Plan reviewed by the appropriate Watershed Official.

Please Choose One

I desire to have my plans reviewed _____ I do not want my plans reviewed _____

The property owner must sign the Steep Slopes Permit Application or provide a signed letter to signify that he or she has reviewed the application and is in agreement with its contents. By signing the permit application or letter, the property owner also consents to the Code Enforcement Officer entering the premises for inspection purposes. The property owner further consents that the Code Enforcement Officer may seek inspection assistance from any persons deemed necessary, including but not limited to, the Canandaigua Lake Watershed Manager, the Canandaigua Lake Watershed Inspector, and the Ontario County Soil and Water Conservation District.

Note: Applicant/Property Owner signature below indicates that the Applicant/Property Owner understands that they will be responsible for all outside consultant fees incurred as a result of the submitted application, and consents to these charges.

I have read and understand the application and the requirements of this permit.
